Patrick, thanks for sharing this. I'll try to get you some written feedback in the next day or two. I'm also thinking it might be helpful to schedule a half hour call for us to discuss the content and process/next steps once folks have had a chance to read it over. Does the Region have a timeline for getting back to ND?

Subject: FW: DRAFT Coyote Station Response to Comments and Source Determination Memo

Hi all,

We just received the latest draft of North Dakota's source determination for Coyote Creek Mine, along with their response to comments. They are asking for any input from us before they finalize and issue these documents. Please weigh in with any comments when you get a chance to read them.

Thanks,

Patrick

Subject: DRAFT Coyote Station Response to Comments and Source Determination Memo

Hello Patrick,

As a follow-up to my voicemail regarding the Otter Tail Power Company - Coyote Station Title V permit renewal. The two documents attached and listed below are the source determination memo (this will look familiar as you have seen a draft of this before, last discussed in March); and the response to comments memo (this is new and address' the comments received on the draft Title V renewal).

Attached you will find:

- "190625Coyote Station Response to Comments on Title V permit_DRAFT" document " (comments received on 7/21/2018 per the Title V renewal for Otter Tail - Coyote Station)
- "190625SourceDeterminationMemo_DRAFT " (for Coyote Station and Coyote Creek Mine, supports the response to comments memo)

NDDEQ would appreciate your review and input regarding these draft documents. At this time, we believe we have addressed each of the comments received and will now (pending comments from you/EPA) be able to complete the permit record for Coyote Station and initiate the 45 day EPA review period for this Title V permit renewal. Once these are finalized, NDDEQ will send an formal letter to initiate the review period.

Should you have any questions, comments, concerns or if you would like to set-up a meeting between NDDEQ and EPA to discuss, let me know.

I apologize for the delay in getting these updated draft files to you for review, quite a bit of legal cases going on in North Dakota which has delayed the process.

Thanks,
David

Subject: Revised ND Source Determination Memo for CS and CCMC - DRAFT

Patrick,

I have attached a revised draft of North Dakota's source determination memorandum for Coyote Station (CS) and Coyote Creek Mine (CCM). This revised draft memo focuses on the LSA and Meadowbrook letter and not on response to comments provided by CS and CCM in their respective responses to comments (which is what the first draft memo highlighted).

Note: our legal hasn't reviewed this revised draft, but we would still appreciate your review and comments.

Once reviewed, please give me a call and we can discuss next steps. If I hear from our legal between now and then, I will contact you with any significant changes we are made aware of.

Thanks,
David Stroh

Subject: North Dakota Source Determination Memo for CS and CCMC - DRAFT

Gail and Patrick,

As a follow-up to our call on February 14, 2019 and regarding the ongoing work with EPA in completing our stationary source determination for the Coyote Station and Coyote Creek Mining Company; please see the attached DRAFT source determination.

The Department has appreciated EPA's comments to date and requests EPA Region 8 review the attached. A follow-up with the Department would be appreciated to provide assurance that the direction taken satisfies the source determination criteria (or provide feedback on the Department's DRAFT determination). This will help ensure not only that the proper decision will be made, but the supporting documentation sufficiently supports this decision.

Please contact me upon review to discuss the next steps.

Thanks,

David Stroh
